SUMMARY

A Full Stack Developer with a proven track record of delivering high-performance solutions. I have extensive experience in Java, Spring Boot, NodeJS, Angular, React.js, and Microservices. I have a strong leadership record, having successfully led migration initiatives and optimized efficiency. I am committed to excellence and have been awarded for my dedicated contributions. I am excited to help you redefine the future of technology!

EDUCATION

B.S Computer Science

Sep 2018 - May 2022

Iqra University

Karachi, Pakistan

EXPERIENCE

Backend Developer

Mar 2024 - Present

AvaFive

Dubai, UAE

- Crafted with Java, TypeScript, Spring Boot, Nest.js, PostgreSQL & Microservices architecture for scalable & robust backend system.
- Proposing Solutions after proper Analysis of Business and System requirements along with Gap Analysis and project documentation.
- Seamlessly integrated front-end magic into Glam Seven using JavaScript, TypeScript, ensuring dynamic user experiences.
- Deploy software systems using Git Version Control Pipeline on AWS and collaborated with cross functional teams.

Full Stack Developer

Mar 2023 - Jan 2024

EzBz Solutions

Karachi, Pakistan

- Implemented product & customer management system to collect and resolve issues of customers and products, including User Acceptance Testing (UAT) for validation.
- Utilized SQL Server for database management and SQL queries for data retrieval and manipulation.
- Implemented Spring API Gateway using proxy server for interchangeable communication between User, Identity, and Product Services, integrating with the database (DB) for seamless data flow along with Core Java.
- Drove project success by preparing release notes, code diagrams, and documentation, ensuring efficiency, with a on-time delivery rate along with Agile Methodologies Techs & Tools.

Software Design Engineer

Apr 2022 - Jan 2023

TeReSol Pvt Ltd.

Karachi, Pakistan

- Led successful migration of the "Teller" and "OBS - Online Banking System" modules, utilizing object-oriented design principles and adhering to the software development lifecycle.
- Utilized Java 11, RedHat Quarkus, and Microservices architecture, employing object-oriented design techniques, to enhance system performance, demonstrating proficient problem-solving skills in Java.
- Collaborated in the development of the Cancel Funds Transfer Microservice, employing object-oriented design methodologies to reduce transaction cancellation time and a bit worked on Jasper Reports for documenting generation.

SKILLS

- [Languages] : Java | Java Script | TypeScript
- [Techs] : Spring Core | Spring Boot | Nest.js | Node.js | Angular
- [Techs] : Spring Security | JWT | Maven | Tomcat | Git, GitLab & GitHub
- [Database Tools] : MySQL | SQL | NoSQL | Hibernate | IBM DB2
- [Used] : Amazon Web Service (AWS) | PostgreSQL | MongoDB | GraphQL
- [Used] : Docker | Oracle | HTML5 | CSS3 | Bootstrap | Apache Kafka
- [Concepts] : J2EE | SOLID Principles | Design Patterns | RESTful APIs | SDLC | Debugging | API Integration | OOP's (Object Oriented Programing)
- [Architectures] : Monolithic | Microservices | Agile Methodology | SOA (Service Oriented Architecture) | EDA (Event Driven Architecture) | MVC (Model View Controller)
- [Stacks] : Full Stack | MEAN Stack | Java Stack

PROJECTS

Admin Panel [Panasonic Europe] Mar 2023 - Jan 2024
[Karachi, Pakistan](#)

- Accomplished increase in data management efficiency by implementing advanced operations for user & product data.
- Empowered administrators with the ability to edit, update, and maintain user profiles with 360-degree view.
- Enhanced the product data management system, resulting in a reduction in data entry errors and a improvement in product catalog maintenance.
- Converted complex business requirements and logic & translate them into practical and efficient technical solutions for betterment of system.
- Streamlined integration with Profile Center and Lumix Pro, reducing manual data transfer efforts and used apache tomcat as a server.

<https://lumixpro.panasonic.eu/>

Teller & Online Banking System [Bank-al-Habib Pakistan] Apr 2022 - Jan 2023
[Karachi, Pakistan](#)

- Implemented microservices architecture, enhancing performance testing capabilities and streamlining project management.
- Achieved cost savings and reduced response time through Docker containerization, bolstering production support efficiency.
- Migrated to Docker, underscoring the bank's commitment to sustainability and minimizing its carbon footprint.
- Accelerated feature delivery, gauged by increased releases per month, showcasing adept project management skills.
- Demonstrated proficiency in software debugging, employing advanced tools and techniques for swift issue identification and resolution, thereby optimizing production support processes.

Mera Thar [Personal Project] Open Source

- Built a Tourism app that helps tourists to visit the Beauty of Tharparkar with one click distance from the required services.
- Impacting many tourists every year to visit the hidden places and enjoy the best services without any guide.
- Increased the economical situation in Tharparkar region by the increased amount of visits by Tourists.
- Designed and implemented responsive and intuitive user interfaces for web and mobile applications.
- Skilled in developing RESTful APIs, adhering to best practices and standards to enable seamless integration and interoperability between systems.
